SUBJECT INDEX

Abstracts and resumes, 382
Acetylation of tissue amines, 352
Acetylcholinesterase in schistosome ova, 133
Acid phosphatase by Gomori method, 389*
Acid phosphatase method for deoxyribonuclease, 255
Acid phosphatase, quantitation, 340
Acridine orange fluorescence of tissue, 392*
Adenine-8-C^{14} incorporation in glia, 400*
Adenosine 5-phosphatase, hepatic, 388*
Adenosine triphosphatase in liver, 61, 388*
Adenosine triphosphatase, renal, 388*
Age and hemoglobin content of erythrocytes, 401*
Aldehyde fuchsin staining, 13
Aldehydes in elastic fibers, 260
Alkaline phosphatase, quantitation, 340
Amines, acetylation and nitrosation, 352
D-Amino acid oxidase localization, 389*
4-Amino-1-N,N-dimethylnaphthylamine, 445
Aminopeptidase in diseased tissue, 395*
Aminopeptidase method, 389*
Amylo-1,6-glucosidase localization, 201, 208, 389*
Amyloid and metachromasia inhibition, 181
Announcements, 160, 465
Antigen autoradiography, 400*
Apparatus for volume quantitation of tissue components, 403*
Ascites tumor glucose reduction, 174
Autoradiography of antigens, 400*
Autoradiography of growing rat bone, 146
Basic proteins in plant tissues, 400*
Basic proteins in plant tumors, 400*
Basophilia of cartilage mucin etc., 399*
Biochemical lactic dehydrogenase localization, 397*
Biochemistry of bronchial epithelium, 105
Blood smear esterase, 457
Bone autoradiography in Mg deficiency, 146
Book Reviews, Books Received, 79, 154, 218, 294, 380, 458
Brain: succinic dehydrogenase, 347
Branching enzyme localization, 201, 208
Bromine-Feulgen microspectrophotometry, 197
Bronchial epithelium cytology & chemistry, 105
Calcium demonstration, 22
Calcium oxalate identification, 405*
Calcium sulfate plaques in sclera, 142
Carbowax flotation procedure, 381
Carbowax method for lipid and elastin, 133
Carbohydrate histochemistry fixation, 309
Cartilage staining after digestion, 391*
Catechol amine pigmentation of intestine, 398*
Chemical protection of enzyme localization, 369
Chloral hydrate formalin for enzymes, 244
Cholinesterase by Koelle variant, 72
Cholinesterase in muscle M bands, 396*
Choline oxidase localization, 389*
Competitive inhibition of enzymes, 395*
Connective tissue, basic dye binding, 278, 416
Connective tissue: oxytalan fibers, 425

Connective tissue staining, 265, 391*
Coons fluorescent antibody method, 271
Crystal violet iodine sorption, 237
Cytochemistry: fixation, 303
Cytochrome oxidase and indophenols, 438
Cytochrome oxidase with modified Nadi, 395*, 445
Cytophotometry and fixation, 43
Cytophotometry of mast cell metachromasia, 402*
Cytoplasmic organelles, osmotic protection, 403*
Dehydration-fixation sequence for enzymes, 397*
Demethylation with KOH, 130, 398
Deoxyribonuclease by a Gomori method, 255
Diphosphopyridine nucleotide diaphorase, 395*
——after formaldehyde fixation, 217
DNA in ox germinal nuclei, 394*
Dopa pigmentation of intestine, 398*
Dopamine pigmentation of intestine, 398*
Elastic fibers, Schiff positive material, 260
Elastin and oxytalan fibers, 425
Electronmicroscopic localization of nucleic acids etc., 391*
Electron microscopy and histochemistry, 1, 303
Electron microscopy, fixation, 303
Enzyme kinetics, histochemical, 431
Enzyme localization, fixation, 322
Enzyme localization, physical and chemical protection, 369
Enzyme survival with chloral formalin, 244
Enzymes, competitive inhibition, 395*
Enzymes in free cells, 390*
Erythrocyte age and density, 401*
Esterase in blood and marrow smears, 457
Feulgen, bromine variant, spectrophotometry, 197
Fixation by freeze substitution, 401*
Fixation, chemical and freeze drying, 435
Fixation for carbohydrate histochemistry, 309
Fixation for cytochemistry, 301, 303
Fixation for electron microscopy, 303
Fixation for enzyme localization, 322
Fixation for histochemistry, 301, 303
Fixation for lipoid histochemistry, 317
Fixation for protein histochemistry, 406
Fixation of cytoplasm, 43
Fixation of glycogen and mucin, 404*
Fluorescent antibody localization, 161
Fluorescence microscopy, 271
Formaldehyde and enzyme survival, 217, 244
Formalin fixation effect on pituitary basophils, 387*
Fractionation for ATPase, 61
Free cell enzyme technics, 390*
Freeze substitution fixation, 401*
β-D-Galactosidase demonstration in rat, 122
Glia cell turnover of nucleic acids, 460*
α-Glucosidase demonstration, 396*
Glucose reduction in ascites tumor, 174
Glycogen in lung and kidney, 52
G-Nadi reaction, new amine reagent, 445
Granulation tissue metachromasia, 402*
Gypsum plaques in sclera, 142
Helminth ova acetylcholinesterase, 139
Histochemical Society Business Meetings, 81, 387
Histochemical Titles from Current Literature, 76, 156, 219, 295, 383, 459
Histochemistry in electron microscopy, 1
Histologic lactic dehydrogenase localization, 397*
Hydra namtocysts, 394*
Indicator dye staining of proteins, 363
Indophenols and cytoderome oxidase, 438
Interference microscopy of a crystalline protein, 393*
Introduction to Symposium, 301
Iron hematoxylin stain significance, 401*
Isotonic sucrose formalin fixation, 404*
Lactic dehydrogenase after formaldehyde, 217
Lactic dehydrogenase localization, 397*
Letters to the Editor, 75, 217, 381, 382, 457
Leucine aminopeptidase in diseased tissue, 397*
Leucine aminopeptidase method, 403*
Lipoid artifacts in retina, 290
Lipoid histochemistry fixation, 317
Localization of ATPase, 61
Magnesium deficiency and bone autoradiography, 146
Mammary stroma changes in estrogen therapy, 404*
Mast cell glycol reaction and methylation, 400*
Mast cell metachromasia, cytophotometry, 402*
Mast cells and granulation tissue metachromasia, 402*
Metachromasia inhibition in amyloid, 181
Metachromasia and mast cells in granulating wounds, 402*
Metachromasia of mast cells, cytophotometry, 402*
Metal chelation monotetrazolium method, 397*
Methacrylate embedding damage, 398*
Methylation and alkali demethylation, 130, 398*
Methylation- demethylation and basophilia, 399*
Methylation and HIO_4 Schiff reaction of mast cells, 399*
Methyl green pyronin supravital stain, 405*
Microincineration of oxalates, 405*
Microspectrophotometry of bromine-Feulgen, 197
Mucopolysaccharide dye binding, 416
Muscle histochemistry, 13, 377
Muscle M band cholinesterase, 396*
Nadi amine reagent, new, 445
Nile blue pepsinogen reaction, 122, 398*
Nitrro-blue tetrazolium, dehydrogenases, 217
Nitro blue tetrazolium, diaphorases, 395*

Nitroneotetrazolium chloride, 112
Nitrosation of tissue amines, 352
Nucleic acids in electron microscopy, 391*
Nucleolar and cytoplasmic ribonucleoproteins, 392*
Nucleotide, diffusible, after freeze dry, 435
Orotic acid-6-C^{14} incorporation in glia, 400*
Osmotic protection of cytoplasmic organelles, 403*
Oximes in Koelle cholinesterase method, 72
Oxytalan connective tissue fibers, 425
Peracetic aldehyde fuchsin, 391*
Philodryas schottii renal pigment, 233
Phosphatases, substrate specific, 251, 255
Phosphatases quantitation, 340
Phosphomolybdic acid stains of collagen, 265
Phosphorylase localization, 201, 208, 389*
Physical protection of enzyme localization, 369
Pigment, renal in *Philodryas*, 233
Pituitary β-cells, formalin fixation, 387*
Polymerization damage in methacrylate 398*
Polysaccharides in electron microscopy, 391*
Post fixation of enzymes after dehydration, 397*
Proceedings of the Histochemical Society 1957, 81
Index to Proceedings, 103
Proceedings of the Histochemical Society 1958, 387
Protein binding of iron hematoxylin, 401*
Protein histochemistry, fixation, 406
Proteins in electron microscopy, 391*
Protein losses in fixation, 43
Protein staining by indicators, 363
Pulmonary and renal glycogen, 52
Pyronins B and Y: impurities, 394*
Quantitation, acid and alkaline phosphatase, 340
Quantitation of cationic dye binding, 278
Quantitation of tissue component volume, 403*
Relative volume of liver cell components, 393*
Renal and lung glycogen, 52
Renal pigment in *Philodryas*, 233
Retinal artifacts, 290
Ribonucleoprotein of nucleolus and cytoplasm, 392*
Schiff reaction of elastin, 260
Scleral plaques with gypsum, 142
Skin phosphorylase and amyloglucosidase, 201, 389*
Skin reduction of tetrazoles, quantitation, 191
Specific refraction increment of a crystalline protein, 393*
Starch electrophoresis zymograms, 396*
Streptococcal hyaluronidase and antihyaluronidase, 161
Stroma leucine aminopeptidase, 395*
Stroma mucopolysaccharides in estrogen treatment, 404*
Substrate specificity of phosphatases, 251, 255
Succinic dehydrogenase in brain, 347
Succinic dehydrogenase localization, 112
Succinic dehydrogenase with metal-tetrazole method, 390*
Sulfhydryl in muscle, 13
Summaries and abstracts, 382
Supravital stain by methyl green pyronin, 405*
Surface acid and basic strength, 363
Symposium: Fixation in Histochemistry, 301–339
Tetrazolium reaction from glucose reduction, 174
2,3,5-Triphenyltetrazolium quantitation in skin, 191
Triphosphopyridine nucleotide diaphorase, 395*
Tryptophan histochemical method, 75
Volume estimation of pancreatic tissue components, 393*
Zymograms for enzyme specificity, 396*
